

Leave the NJ "Do not call law" alone! I don't get bothered at all. That's the way I like it. What's more is my 75 year old mom is not exposed to thoses pests. NJ did it right the first time, and the feds (like everything else they do) had to water down their version of the law. If you want to make both the NJ, and the Federal law the same, change the Federal law to make it as strong as the NJ law.
